

## ***ZT-500 Automatic Granule Brick Vacuum Bag Packaging Machine***

The packaging machine can be vacuumed with different weight and filling system for various granule and powder like rice, beans, pet food, ground coffee, milk powder and food additive etc.

### **Features**

1. The machine is for film bag with sexing, could be realized automatically supply, weighing, bag making, filling, shaping, vacuuming, sealing, cutting and conveyor;
2. mostly use for bulk production in order to keep the packing beauty and good sealing
3. quite low speed with competitive price and easy operation

### **Technical Specifications**

MODEL	ZT-500
Bag Type	vacuum & reseal brick bag
Maximum Capacity	up to 2kg
Minimum Capacity	depend on product characteristics but normal 100g
Speed	8-20bags/min (depend on products characteristics)
Hopper Capacity	50 Litres
Weighing Accuracy	± 0.2% depend on products characteristics
Bag Length	50 - 340mm

Bag Width		80 - 260mm
Reel Film Width		≤ 540mm
Film Thickness		0.04 - 0.12mm
Reel Outer Dia.		400mm
Reel Inner Dia.		75mm
Voltage		AC220V/50Hz 1 phase or customer specification
Machine	ZVF-260	3kw, 800kg, 1650*1140*1650mm
	ZW-2000	1.2kw, 250kg, 1000*950*2200mm
	ZV-1000	5.5kw, 600kg, 3125*660*1050mm
Compressed Air Requirement		0.6MPa 0.36M3/min
