

## *Ribbon mixer 500-2000L*

The Trough-Type Mixing Machine is a durable, high-efficiency industrial mixer designed for the uniform blending of powders, granules, and pastes, widely used in various industries. Constructed from stainless steel, it ensures hygiene and durability, featuring a sealed mixing shaft to maintain product purity. The mixer's compact design minimizes space usage, with easy cleaning and user-friendly controls. Available in various large-capacity models, this mixer is suitable for medium to large-scale production needs.

### **Features**

- High Durability: Constructed with stainless steel for longevity and easy maintenance.
- Efficient Sealing: Prevents material contamination, ensuring product integrity.
- Compact and Space-Saving Design: Optimizes floor space in production facilities.
- User-Friendly Operation: Simple controls reduce operational complexity and downtime.
- High Mixing Efficiency: S-type blades offer thorough and even mixing.
- Adjustable Mixing Speed: Allows customization for different material properties.

## Technical Specifications

Model	Blade Type	Working Volume (L)	Mixing Speed (r/min)	Tilting Angle	Mixing Motor Power (kW)	Tilting Motor Power (kW)	Dimensions (L × W × H) (mm)
500L	S-Type	500	24	≤105°	7.5	1.5	2350 × 800 × 1300
600L	S-Type	600	24	≤105°	11	2.2	2400 × 850 × 1350
1000L	S-Type	1000	24	≤105°	15	3.0	2800 × 1000 × 1500
2000L	S-Type	2000	24	≤105°	22	4.0	3200 × 1200 × 1700
