

UT124 High Speed Automatic Wet Food Tin Can Sardines Seafood Vacuum Sealer Sealing Machine

This product is mainly suitable for all kinds of canned fruit, canned meat, canned pet food, canned seafood, etc. With advanced design, reasonable structure and simple operation, it is an ideal and necessary packaging equipment for the food, medicine, and chemical industry.

Feature

- * The machine head can be lifted and lowered electrically without manual adjustment, which is convenient and fast.
- * Sealing chuck head and sealing rollers are made with 440C stainless steel material and go through vacuum quenching tempering heat treatment to ensure high hardness and durability.
- * Working mode: vacuum and sealing in the patented design vacuum chamber.
- * Real-time monitoring of vacuum degree can be displayed, and vacuum degree can be adjusted as needed.
- * Waterproof design, easy to clean by water.
- * In vacuum mode, the vacuum degree can reach -40kpa after sealing and the maximum speed can reach 30-40 cans/min.
- * The whole machine is equipped with a waterproof design, which can directly wash the machine, and there is a sink with a strainer under the washable countertop; the external electric case which is convenient for washing the machine, and avoid damaging electrical components when encountering water.
- * Can body does not rotate with good sealing performance.
- * Suitable for a variety of round cans including plastic cans, tinplate cans, aluminum cans, etc.

Specification

Function	High speed vacuum tin canning, can seaming, can sealing
Sealing Rollers	4(2 first rollers / 2 second rollers)
Sealing Speed	30-40 cans/min
Sealing Height	30-150mm(adjustable)
Sealing Diameter	50-100mm(8 station)
Voltage	380V,50/60Hz
Power	4.8KW
Weight	800KG
Dimension	3000*1300*1400mm(L*W*H)
Air Source Pressure	0.6-0.8MPa
