

JY-ZB400 Automatic Feeding Ice Candy Packing Machine

This is our ice candy packaging machine. We use the elevating feeding system to infeed the ice candy to flow packing machine. The feeding and packaging system is efficient, economic and stable. Welcome to contact us for more details.

Feature:

1. Three Servo Motors Control, low maintenance, long service life and rapid reaction.
2. Intelligent temperature controller system, displayed easily, easy for setting, low rate of maintenance.
3. Reasonable structure, stable running with high quality.
4. Elevator Hopper to automatic feed the ice bar to packaging machine.

Technical parameters:

Model	JY-ZB400
Packing speed	50-400 grains/min
Paper roller width	300mm
Film width	MAX 280mm
Sealing Jaw Width	180mm
Product width	60-130mm
Finished bag size	100-250mm
Total Power	5kw
Dimensions	3800*990*1570mm
Net weight	950kg
Voltage	220V/380V(customized)
Wrapping film	OPP, CPP, PET, Aluminium plating film, any hot sealing film
