

SH-XG445 Automatic Cleanser Detergent Trigger Pump Spray Bottle Cap Screwing Cap Tightening Capping Machine

During the automatic feeding caps process, the cap may be placed skewed due to the long tube inside bottle. This bottle cap tightening machine is designed for solving this problem, it will press the cap slightly after feeding caps and then tighten bottle caps automatically. This spray bottle capping machine is widely used in advanced cosmetics, daily chemical industries.

Main Feature

- ▶ It is suitable for feeding bottle caps and tighten bottles, which has long tube inside bottles.
- ▶ Can work with automatic filling and labeling machine to realize automated production

Parameter

- Machine model: SH-XG445
- Voltage: 110/220V
- Power: 900W
- Capacity: 20-25 Bottle/Min(based on bottle and cap size)
- Air pressure: 0.6-0.8Mpa
- Suitable bottles: Customize according to sample
- Cap feeding way: Pneumatic fetch
- Capping way: Servo drive screw capping
- Machine size: About 2900*950*2000mm
- Packaging size: About 3020*905*2140mm(machine),1870*1220*840mm(Vibratory bowl sorter)
- Packaging weight: About 600kg(machine),316kg(Vibratory bowl sorter)
