

DF-Y&DS-3 Semi Automatic Powder Auger Filling Weighting Machine

This machine is an economical and practical small particles of powder and automatic filling machines, automatic positioning can finish the bottle, filling and metering, etc., by a filling his head, a conveyor belt and chain plate composed of a positioning device, the use of servo motors, PLC and touch screen control, easy operation, high stability. With Unscramble, capping machine, labeling machine set of filling lines and other components. Used for packing powder and small particles of materials such as powder, small granules drugs, veterinary drugs, glucose, spices, solid drink, toner, powder, pesticides and so on.

Technical Parameters

Model	DS-3
Power supply	220V 50/60HZ
Power	1.5KW
Lift height	1600mm(can be customized)
Hopper	120L (can be customized)
Output	1000-3000 Kg/h
Dimension	900*870*1000mm
Weight	100KG

Model	DF-Y
Powder supply	220-240V 50/60HZ
Output	5-20bags/min
Filling accuracy	±1%
Filling range	5-5000g
Power	1.5KW
Hopper volume	40L
Dimension	1950*650*850mm
Weight	150Kg
