

SED-MS Automatic Cotton Inserting Machine Pharmaceutical Machinery Equipment

The cotton inserting machine is to insert a cotton strip into the spare part of the bottle to solve the collision and damage caused by bumps and other reasons during the transportation of drugs, which meets the GMP requirements.

Feature of Cotton Inserting Machine

1. Strong compatibility, suitable for various sizes of round bottles, flat bottles, square bottles, etc.
2. The pre placed medical cotton belt design is adopted to avoid uneven cotton transmission and to ensure the accuracy of cotton length.
3. High durability cutter edge, can make accurate and reliable shearing.
4. It has multiple detection and alarm control functions, to ensure the continuity of the equipment operation and the accuracy of cotton insertion

Product Parameters

Model	SED-MS
Production capacity	50 bottles / min
Applicable bottle type	All kinds of bottles with a mouth no less than 17mm
Air source	0.6Mpa
Rated voltage	220V 50HZ
Rated power	0.7kw
Host weight	280kg
Outline size	1400×800×1550mm
