

SED-226-10Y-A GMP Standards Rotary Tablet Press Machine Pill Press Machine

This machine is a two-color tablet press. It compresses granular raw materials into various tablets. It is mainly used in the production of tablets in the pharmaceutical industry. It is also suitable for chemical, food, electronics, plastics, powder metallurgy and other industries.

Feature

- 1: The outer enclosure is fully enclosed, made of stainless steel, and conforms to GMP standards
- 2: Equipped with a transparent glass observation window, which can clearly see the working conditions of the machine and can be fully opened, which is easy for internal cleaning and maintenance
- 3: This machine has high pressure and large tablet diameter, which can compress ordinary, special-shaped and ring-shaped tablets. It is especially suitable for multi-variety and small-batch production.
- 4: Mechatronics, all controllers and adjusting devices are concentrated on one side of the body, easy to operate
- 5: Equipped with pressure overload protection device to avoid machine damage
- 6: The transmission mechanism adopts oil-immersed lubrication, which is sealed under the body to extend the service life and avoid cross-contamination.

Product Parameters

Model	SED226-10Y-A
Number of stations	10
Maximum main pressing force (kn)	60
Maximum preload pressure (kn)	10
Maximum tablet diameter (mm)	25
Maximum tablet thickness (mm)	8
Maximum filling depth (mm)	15
Turntable speed (rev/min)	40
Production capacity (pieces/hour)	24000
Main motor power (kw)	2.2
Machine shape (L*W*H mm)	615×890×1415
Machine weight (kg)	1000
