

SED-170SZB-A Full Automatic Pillow Type Packing Machine With Longlife Time

This downward paper pillow packaging machine is driven by three servos and has independent control, feed detection, and anti air bag cutting functions; The conveying method depends on the material conveying,

Automatic positioning and feeding, capable of connecting different conveyors to identify materials; The machine adopts a stainless steel structure for its exterior design,

Smooth design, beautiful appearance, and easy operation; High sensitivity viewpoint eye color marker tracking, digital input of sealing and cutting position, makes the sealing and cutting position more accurate;

Compatible with multiple specifications of product packaging, easy to adjust;

Optional auxiliary functions such as coding and inkjet printing; All controls are implemented through software, making it easy to adjust functions and upgrade technology, and never falling behind.

Application of Packing Machine

- This device is widely used in food (bread, chocolate, persimmons, cookies, lollipops, etc.), daily necessities (syringes, pens, bottles, books, knives, forks, spoons, etc.)
- Soap, towels, etc.), medical supplies (masks, gloves, protective clothing, hats, etc.), hardware and daily chemical products (screws
- Packaging of products such as switches, sockets, chargers, data cables, etc.
- The device has a compact structure, stable performance, and simple operation,
- Fault self diagnosis function, fault display is clear at a glance, and maintenance is more efficient

- Convenient. The product packaging has a high qualification rate and beautiful sealing, greatly improving efficiency and reducing labor costs for customers.

Machine Parameters

Max. Film width	440mm
Suitable film thickness	440mm
Length of bags	0.03-0.06mm
Material Packaging width	25-170mm
Packaging height	5-45mm
(L*W*H)	4239*920*1355mm
Weight	650kg
