

JY-400E Full Automatic Feeding and Packaging System

This automatic Packaging machinery has completely changed the manual materials discharging and packaging mode of traditional manufacturers since it applies fully automatic materials feeding, the products are fed into the packaging line from the production line, which may automatically adjust the speed and position of the products, thus making the products enter into the packaging machine orderly and correctly. Automatically control the start, stop and speed of the packaging machine according to the state of product, completely free of manual control.

Applicable for:

Moon cake, bread, biscuits, rice rolls, pie, chocolate and other foods as well as regular non-food items, sorting, conveying, feeding and packaging.

Technical parameter

Packing speed (bag/minute)	30-200
Packing size (mm) Length x Width x Height	L60-350 W30-120 H5-60
Maximum width of film (mm)	400
Thickness of film (mm)	≥0.020
Total power	3.8KW
Rated voltage	220V
Rated frequency	50HZ
Weight of the machine	1000KG
