

## A922U Front/Back /Top and Orientation Wrap-around Labeling System

The A922U is a multi-function labeling system that can handle front/back and top labeling on the three sides of flat bottles. The system is also equipped with a wrap-around station for wrap-around labeling on round bottles with orientation, and a top labeling engine for labeling on the cap of the bottles. Using our proven bottle separation wheels, alignment chain, and hold-down belt mechanism, the front/side labeling of the system offers consistently high labeling precision. The wrap-around labeling mechanism uses a pneumatic arm to hold the bottle body for stationary rotation during labeling, allowing extra parallel precision for the label. The A922U is a versatile, easy to use and robust workhorse for your packaging line.

### Features:

Model	A922U
Name	Front/Back /Top and Orientation Wrap-around Labeling System
Capacity	50~180pbm
Weight	600kg
Electricity	2kW 50Hz 220VAC±5%
Dimension (for reference)	(L)3,000×(W)1,610×(H)1,640 mm
