

Electro Scale Granule Packing Machine DXD-150G

Characteristics:

1. The electro scale granule packing machine comes with PLC programmable control and an English and Chinese display screen, making it easy to operate and maintain. It is easy to adjust and fully automatic.
2. With an advanced photoelectric digital control system, the pouch length can be easily adjusted. The granule packing machine offers accurate printing and counting.
3. It features a light touch display screen with number input and display, air proofing, insulation, durability, corrosion resistance, and easy operation.

Usage:

The electro scale granule packing machine is used for packing loose, non sticky granular materials such as pellets, sugar, soup, oatmeal, seeds, coffee, instant drink, detergent power, beef jerky and more. It is used in the pharmacy, food, and agriculture industries.

Main Technological Parameters:

| Item/Model | DXD-150G |
|--------------------|---|
| Pouch length | 80-180mm |
| Pouch width | 70-120mm |
| Sealing fashion | 3-side back sealing |
| Packing speed | 20-50bags/min, depending on pouch size and material |
| Range of measuring | 10-120ml /bag |
| Applicable film | PET/AL/PE, PET/PE, NY/AL/PE, NY/PE |
| Electric source | 380V 3 phase 4 wires 50Hz (as per customer's request) |
| Total power | 1.5kw |
| G.W. | 400 Kg |
| Package size | 1220*1000*1900mm(LxWxH) |
