

Automatic Shrink Sleeve Labeling Machine WP-series

Within a certain diameter range, this machine can be used for many types of bottles: round, square, oval, conical or other irregular shapes.

Features:

1. It is a high automatic packing machine. Just one person handles. Easily operation.
2. The productivity is high, the civil construction cost is less, the working environment is better, and product quality is good.
3. Adopt PLC controller, imported servo motor, servo drive, frequency and sensor.
4. The fixed position frame to sure labeling accurate, fast and stability.
5. Adjustable knife plan: original creation, double side edge of knife, long service time.
6. High safety and stability for operation and saving time of manpower.
