

Soft Tube Filling and Sealing Machine

Soft tube filling and sealing machine used for aluminum tube. Which is filling and sealing filling volume is 5-200ml, the sealing place use fourfold or three fold, and the sealing is beautiful the control place use PLC+touch screen (SIEMENS) will ensure the good quality of the machine.

Soft tube filling and sealing machine use for filling cream, ointment, paste, lotion, gel, glue, paint and others

Soft tube filling and sealing machine main used for Cosmetics industry, light industry (household chemical industry), pharmaceutical industry, food industry and etc.

It's suitable for the products that use hoses as the packing containers. It can fill ointment, cream, gel, high viscous flow and etc. into the hoses, seal the tail of the hoses by pressing in the hot-melting condition, print letter codes, and prune and train the tail of hoses, at last discharge the finished product.

Specifications:

Tube filling volume	20-200 ml/30-300ml
Filling capacity	40-60 bottle per minute
Tube length	50-200mm
Tube Diameter	10-50mm
Filling Precision	99%
Motor	1.5KW
Hot air Gun	3KW
Air work pressure	0.5-0.6MPA
Air compressore	0.6m ³ /min
