

## *LPJ-2 Arranging Bottles Machine*

The function of the machine is to disperse and arrange the pell-mell bottles to the conveyor neatly. It meets the requirement for full automation. The machine is necessary for high production filling line and it can save more time and be more effective. The machine can be used with packing line machines such as capsule counting machine, input paper machine, capping machine and labeling machine. Different styles of bottles can be adjusted by customers' request to improve the machine's system. The machine is suitable for industries like pharmaceutical, food, light industry and chemical.

### **Technical parameters:**

- ◆ Production capacity: 40-100 bottle/min
- ◆ Power supply: 220V/50-60Hz
- ◆ Total power: 500W
- ◆ Weight: 280kg
- ◆ Dimension: 950×950×1100mm
