

Adhesive Tape Shrink Sleeve Applicator LR-100(CE)

Adhesive Tape Shrink Sleeve Applicator, LR-100 is specially designed by inserting shrink band, placing paper label & shrinking full packaging process for tape. Modularized main machine & mechanism are easy adjustment & quick change. Its cutter is designed particularly for easy replacing to save time. AI control system can be installed to help smart production.

Features:

- Full-side guarding cover matches safety requirement & protects worker from injury by running parts.
- HMI control system help worker from easy operation & trouble shooting by signal showing on screen.
- Machine can work with PET, PVC & OPS. Besides adhesive tape, machine can pack products with similar shape.
- The most advantage is to save space for design of this machine, which has rotating transportation plate with jigs to hold the adhesive tapes from feeding conveyor to discharging conveyor; full working procedures are complete in same machine, easy feeding & collecting with not just saving space, but also saving time & manpower.

Specification:

- Power: 3Ø 220V 30A
- Machine Dimension: 2754mm (L) x 1370mm (W) x 2015mm (H)
- Applying Tape Size: OD 50mm ~ 100mm
- Core Size: 38mm ~ 55mm
- Tape Height: 19mm ~ 60mm
- LR-100 is specially for adhesive tape packaging.
- Packaging size: OD 60 - 70mm; Width 18 - 24mm.
- Packaging speed: 50pc/min, speed will be different basing on packaging size.
- Change parts are required for different size packaging.

Applications:

Specially for Adhesive Tape Packaging.
