

YPK-4025/40/60 High Speed Case Erector

YPK-4025/40/60 is different from YPK-4012. The high-speed open-box machine uses horizontal way to open box. This erector machine decomposes every action of open-box and completes it at different work stations. Therefore, the speed is faster. At present, there are three speed types of high-speed open-box machine, 25 boxes/minute, 40 boxes/minute and 60 boxes/minute.

Characteristics:

- * 3 kinds of speed can be chosen
- * Different work stations can erect, more efficient
- * Imported electrical configuration, more stable performance
- * Can be used alone or in conjunction with the conveyor line.

Variants & Options:

- * Customized by the carton size
- * Overlep can be customized
- * Voltage
- * Electrical parts brand
- * Stainless steel frame

Technical Parameter

Model	YPK-4025
Voltage	380V 50Hz 3P
Power	2KW
Speed	20-25 boxes/min
Table Height	950mm
Air	5kg/cm ²
Specification	Cylinder:AIRTAC
	Motor: Taiwan CPG
	PLC:Siemense
	Touchscreen: Siemense
	Electrical key parts: Schneider / Omron
Applicable Carton	L+W ≤ 900mm;
	W ≤ 400mm;
	H+1/2W ≤ 530mm;
	1/2W ≤ 200mm
Tape	W48-72mm
Machine Size	L2372*W1210*H1820 mm
Machine Weight	1000kg
