

Automatic Horizontal Sachet Filling Sealing Machine DJZ-180/240

MAJOR CHARACTERISTICS

1. This machine is suitable for hot sealing multi-layers compound packing material. It combines the function of bag making, bag filling, coding and sealing etc. Choose different types of packing equipment can be suitable for packing different products, such as: powder, paste, granular, and liquid. This horizontal packing machine is special for liquid, and high viscosity liquid, Like SC, EC, SL, ETC, also for non-viscous paste.
2. This type machine is controlled by PLC and touch screen control panel, which is easy operation and of high eligibility rate.
3. The control parts of this machine is controlled by the frequency conversion speeder of PLC, It has high control ability and high automation, No opening of bags, no filling. Photo-electricity sensor, coder, approximate switch are all from international famous brand .
4. This machine can be applied to pack double bags, multi-position filling and anti-counterfeiting.
5. It is characterized by it's high speed, all parts which contact with the filling material are made of stainless steel.

TECHNICAL PARAMETERS:

Item	Performance
Machine overall dimension (LxWxH)	3500mm*970mm*2000mm
Machine weight	1080KG
Power supply	220V/380V 50/60HZ
Power	4.5KW

Bag size making	Single bag: Min: 180mm(w)*225mm(H); Max: 85mm(W)*110mm(H); Double-chamber bag:Max: (90+90)mm (W)×160mm (H) Min: (60+60mm) (W) ×70mm (H)
Film roll diameter	Outer diameter: Φ380mm; inner diameter: Φ70-Φ80mm
Packing speed	40-80 bags /minute
Air source	0.6MPa clean and compressed air
Air consumption	40L/min
