

CCE-ZT220 Three-Dimensional Pillow Packaging Machine

This machine is suitable for wrapping medicine, health care products, nutritious tonics, food, daily cosmetics, stationery, VCD tapes, poker, cigarettes and other small square items. It is an ideal box type three-dimensional packaging equipment.

Description

This machine is a general-purpose equipment for three-dimensional packaging of square cardboard boxes and packages with different specifications, which are made of glass paper PVC and BOPP film. Transparent paper (film) and a folding cable printed with graphic or holographic laser logo are pasted with adhesive to facilitate the folding and anti-counterfeiting functions of finished products.

Technical Parameters:
