

HY-130 HFFS Horizontal Forming Filling Sealing Pouch Packing Machine

HY-130 HFFS Horizontal rolling film pouch forming filling sealing packing machine is suitable for heat sealable laminated multi-layers film. This machine contains motor film-releasing, film forming, bottom sealing, vertical sealing, cutting, pouch opening and filling, pouch transferring and top sealing.

PLC touch screen control panel, make the machine more convenient and adjustable.

HY-130 HFFS Horizontal Rolling Film Sachet Forming Filling Sealing Packing Machine can achieve the single bags' packing. This machine with fast speed is easy to change the packing specifications, all the parts which contact the filling material are made of high quality stainless steel, it is an ideal choice for agrochemical, pharmacy, chemical foodstuff and cosmetic industries.

Main Technical Data

- Packing precision: $\leq \pm 1\%$
- Filling capacity: 200ml or gm (according to the proportion of materials)
- Packing speed: 40-65sachets/minute
- Sachet width: 65×140 mm
- Sachet height: 70×180 mm
- Inner size of roller film: $\Phi 70 \times 80$ mm
- Outer size of roller film: $\leq \Phi 500$ mm
- Voltage: ~380V/50Hz (three-phase four -wire)
- Total power: 3.5kw
- Air pressure: 0.6-0.8Mpa
- Air consumption: 0.6m³/min
- Weight: About 800kg
- Dimensions: 2800×950×1500 mm
