

Single Side Fully Automatic Bottle Labeling Machine ST-45B

Automatic single side fully automatic bottle labeling machine is suitable for party or take the side of the labeling flat bottle shape can be equipped with independent plastic body, especially for the cosmetic industry and so on. Irregular shape object automatic labeling, can be equipped with rollers.

Meanwhile, the automatic labeling of the round bottle can be realized. Plastic belt can be tilted design, headers, eight dimensions adjustment, any products can be adjusted within few minutes to complete the host adopt servo motor, achieve real closed—loop control, to avoid the common stepper motor “blind walk” phenomenon, high precision subdivision, built—in absolute encoder, all this is designed to improve the accuracy.

The special design of the plastic body to ensure the accurate positioning of the object. Implement accurate labeling.

The label has been scraped and flattened, the non—powered sponge roller compaction, and the power sponge roller squeezes and so on, which is not produced by air bubbles, especially for the transparent label of the frosted bottle.

Technical Parameters:

Model	ST-45B
Labeling Speed	40m/min(80-200pcs/min)
Labeling Accuracy	±1mm
Label Max width	190mm (can be custom)
Size of Pasted item	Thickness:≥30mm Height:≤500mm
Diameter of paper roll	φ76mm
Diameter of the roll	Max350mm
Machine Size	L2400*W1200*H1500mm
Weight	280kg
Use of electricity	380/220V 50HZ 2300W
