

Bottle Filling And Sealing Machine

Automatic Bottle filling and sealing machine is suitable for washing liquid, shower gel, cleaning agent, degreasing agent and other water and liquid products, and can fill different types of liquid and paste products. The utility model has the advantages of high filling precision, convenient installation and commissioning, simple cleaning and maintenance, no drip and leakage, etc. The parts in contact with materials are made of 304 stainless steel (316L stainless steel can be customized), and the all stainless steel frame has the characteristics of clean and tidy, beautiful and generous appearance. Bottle filling and sealing machine adopts Taiwan PLC control, touch screen man-machine interface, German sick light eye, German FESTO \ Taiwan AIRTAC and other imported components to implement automatic filling, automatic bottle discharge, automatic capping and automatic sealing. Electrical and pneumatic components are international brands, so that the whole Bottle filling and sealing machine has the performance of stable performance and flexible operation.

Technical Parameters:

- Product name: Bottle filling and sealing machine
- Filling volume: 5-5000ML
- Applicable bottle height: 20-150HM
- Throughput: 30-60 cans / min
- Filling Precision: 1%
- Working pressure: 0.6-0.8MPa
- Voltage: 220V/110V 50Hz/60Hz
- Power: 2.5KN
- Number of filling heads: 4 heads
- Applicable bottle cap: Plastic round cover
