

JYT-250 Fully Automatic Vitamin/Pill/Milk Calcium Tablet Packing Machine

The machine integrates ten functions such as coil uncoiling, aluminum-plastic feeding, blister forming, filling, waste recycling, heat sealing, batch number printing, mesh indentation, sheet blanking, finished product counting, etc. The finished product is well sealed and safe health.

The machine is suitable for medicine, food, health care products, cosmetics and other industries, such as sugar-coated tablets, capsules, tablets, cod liver oil, milk tablets, candy, skin care lotion, jam, etc.

Main Features

1. The machine can automatically complete film feeding, pressing, conveying, cutting, automatic shutdown and alarming.
2. It utilizes plate-type heating plate for heating. PVC sheets can be formed by positive pressure by heating to just about 105 °C.
3. The frequency conversion stepless speed regulation is adopted, the punching speed is fast, and the adjustment is convenient.
4. It adopts the screw rod drive device. The packaging size of various sheets can be adjusted on the guide rail of the machine base at will.
5. The pneumatic roller traction device is controlled by PLC, with simple structure and accurate operation.

Product Specification

Model	JYT-250
Cutting Frequency	25-50 times/min
Capacity	6000-12000strip/hour
Max shaping areas and depth	300x120x20mm
Air Pressure	0.4-0.6Mpa
Power Supply	380V/220V 50Hz
Voltage	8.5kw
PVC hard pieces	0.25-0.5*250mm
PTP Aluminum Foil	0.02-0.035*250mm
Dialysis Paper	50-100g*250mm
Mould Cooling	tap water or back water
Machine dimensions	4000mm×760mm×1620mm
Net weight	1650Kg
