

## *GTI-Z200 Automatic Powder Capsule Filling Machine*

Z series Automatic Capsule Filling Machine is specially designed for drug filling of hard capsules, and various models of machines are available. It is widely used for filling different kinds of drugs due to its multi-purpose, perfect function, reliable performance and accurate filling. It has unique design and can complete the mixed filling of different drugs in the same capsule.

GTI-Z200 automatic capsule filler processes the products for optimal productivity up to 12,000 capsules per hour, featuring low-maintenance operation, minimal downtime, and overall dependable production. Filling of pellets is available. With different specifications of mould, No. 00 to No. 5 hard capsules and safety capsules A, B, C, D, E can be filled. Both slow-released pellets fill and mixed fill with powder and pellets can be realized.
