

L Bar Sealer With Shrink Wrapping Machine FQL-450A/550A

The automatic L-shaped sealing and cutting packaging machine is a fully automatic unmanned packaging machine, with automatic film feeding and punching device, manual adjustment film guide system and manual adjustment feeding and conveying platform. It can be used with packaging lines, feeding. The bagging, sealing and cutting, and shrinkage are automatically completed (the sealing function and non-standard machine can be customized according to the actual product specifications). With high work efficiency, it is widely used in high-volume shrink packaging industries such as printing, electronic products, food, color boxes, cosmetics, greeting cards, photo albums, photo frames, medicine, daily chemicals, cosmetics, flooring, ceramics, beverages, and hardware.

Technical Parameters

Model	FQL-450A	FQL-550A
Voltage	220V 50/60HZ	220V 50/60HZ
Max Packing Capacity	35pcs/min	35pcs/min
Max Sealing Length(mm)	560	560
Max Sealing Height(mm)	150	150
Packing Width(mm)	350	450
Product Size(mm)	Width+Height<380	Width+Height<380
Power	1.55kw	1.75kw
Film Type	POF	POF
Max Film Size(mm)	500*260	600*260
Working Height(mm)	780-850	780-850
Air Pressure	0.6-0.8Mpa	0.6-0.8Mpa
Dimension	1650x880x1450mm	1850x980x1450mm
Weight	300kg	350kg
