

T-212 Automatic Vertical Round Bottle Labeling Machine

It is one of the round bottle labeling machine, be used in medicine, food, cosmetics line, can be labeled on full round or semi round.

Feature

1. Be widely used, can be labeled on full round or semi round. Be easy to shift labels between bottles, adjustment convenient.
2. Label cover label in one position, label road adopt correction mechanism, label belt no diverge, label position X/Y/Z 3 direction and slip degree can be adjusted by 8 angle degree. No dead corner
3. High quality of labeling, adopt elastic cover label belt, label even, no scrape, improve packing quality.
4. Application flexible, vertical for labeling, have automatic sub bottle, can single work and work together with assembly line.
5. Intelligent control, Automatic photoelectric tracing, no label for when product didn't come, automatic correct, automatic testing, can avoid leaking and wasting.
6. High stability, Panasonic PLC+KUNLUN TONGTAI Screen+Panasonic needle electronic eye+Leuze label testing electronic eye as the high grade electronic control, support equipment working at 7*24hours;

Technical Parameters

Labeling speed	30-200p/min
Labeling accurate	±1mm
Product scope	φ25mm~φ100mm,H25mm~230mm
Label scope	Width 15mm~130mm, Length 20mm~320mm
voltage	220V
Outer size	L*W*H 1950×1100×1300mm
