

BYC-1250 Simplified Coating Machine

Chinese water chestnut-type coating machine is mainly used for the pharmaceutical industry in the compaction of the tablets, pills, and coated particles can also be used in the food industry in the mechanism or candy coating.

The sugar-coated tablet coated after being coating polished has bright and smooth surface. It protects the tablet core from oxidizing and deteriorating, from being affected with damp or volatilizing, it also covers the peculiar smell of tablet core, makes it easy for distinguishing and dissolving in human stomach intestine system.

Technical Parameters

Dia of pot	1250mm
Production capacity	80-150kg/time
Regulating range of air temp.	Normal temperature-80°C
Regulating range of motor power	0~28r/min
Main motor	2.2kw
Power of blower fan	370w
Air compressor	Self-prepare
Total heating power	6kw
Solenoid valve	G1/8 "
