

Automatic Vertical Packing Machine MZH-61

This Automatic Intermittent Vertical Packing Machine Use For Aluminum Plated Plastic Film Packaging is suitable for food particles * powder * liquid * sauce body and other items of measurement packaging

Detailed introduction

1. This Automatic vertical packing machine aluminum plated plastic film packaging can automatically complete the bag-making, measuring, blanking, sealing, cutting, counting, according to customer requirements can be configured to print the batch number and other functions. Machine is 304/316 stainless steel, in line with GMP factory standard.

2. Adopts PLC touch screen operation control, bag length, driving a stepper motor control performance stability * detection accurate adjustment convenient o intelligent temperature controller, PID control, can reduce the error range of temperature control within 1 Š. Stable operation, low noise, no need of lubricating oil, save electricity.

Blanking method:	matching according to customer demand (attached blanking structure drawing)
Measurement range:	1-100 g(4-300 ml)
Packaging speed:	30-60 packages per minute (depending on the characteristics of materials)
Sealing form:	three side sealing x back sealing x four side sealing
Size of outer bag: length:	length: 30-170(mm) width :30-140(mm)
Power source:	220V/ 50Hz / 1.4k *
Total weight:	about 400 KG
Dimensions:	740*940*1750(mm) (l*w*h)
