

Cosmetic Filling Machine

This cosmetic filling machine is specially designed for the unscrambling, conveying, filling, and capping of small plastic bottles. Its main components include unscrambler, conveyor belt, filling machine, and capper.

Features:

1. Compact structure, high automation degree, and high production efficiency.
2. High precision filling and reliable capping.
3. Easy to operate and maintain.
4. Its output can be as many as 7000 bottles per hour.

Main Parameters:

Production Capacity	4000~7000 bottle/hour
Scope	10-200 grams
Measurement Accuracy	+/-1%
Rate of Cap Screwing	≥99%
Consumption of Compressed Air	36 m3/h
Electric Supply	380V/50hz, 3phase
Power	2.5kw
Size	4150×2650×1600mm
