

## *Horizontal Round Labeler with Side Applicator NLR-460S*

NLR-460S Horizontal wrap around labeler plus tamp labeler is built for cosmetic products like lipstick or other cylindrical product labeling requirement. Equipped with tamp label applicator, it can attach label on the lateral. Moreover, the medical class conveyor makes it also suits for pharmaceutical industry like vials and ampoules.

### **Features:**

1. Inter-meshed rollers complies with cGMP standard and rotate freely.
2. Equipped with tamp label applicator to attached label on lateral.
3. Horizontal wrap station makes labels adhered perfectly
4. Customized roller conveyor for accurate placement without skewing.
5. Labeling height and angle are adjustable.
6. Horizontal wrap station is designed for cylinder containers which can't stand vertically.
7. Controlled by Microprocessor system with LED screen.
8. No repositioning or timing adjustment is necessary when changing bottle size.
9. Advanced detection system makes precise labeling
10. Made of stainless steel and high quality aluminum alloy.

### **Specification:**

- Labeling speed: 40~60 pcs/min
- Accuracy:  $\pm 1$ mm
- Bottle size: Dia: 9.5~25 mm / Height: 30 ~160mm
- Label size: (W)10~100mm (L) 20~300mm
- Label roll: ID 75mm, OD< 300mm
- Power supply: 110V or 220V, 50/ 60 Hz

**Option Accessories:**

- Hot foil date coder
- Transparent label sensor
- PLC+HMI control system
- Automatic feeder
