

## YK Series Swaying Granulator

### Product Details

The machine is used for forming the required moist powder particles, but also dry bulk material can be crushed to the desired particle. The main feature is in the development of the particles, the speed of rotation of the drum can be adjusted. Screen easy assembly and disassembly, tension is also adjustable. Mechanical transmission system totally enclosed in the body, together with automatic lubrication system to improve the parts of life.

### Working principle:

By mechanical drive drum swing back and forth, the material extruded from sieve granulated or crushed granulated.

### Technical Parameters:

Parameter	model		
	YK60	YK90	YK160
Roller diameter mm	φ60	φ90	φ160
Swing angle (o)	184	290	360
Roller Speed r/min	46	46	55
Yield kg/h	20-25	40-50	100-300
Motor Power kw	0.55	0.55	2.2
Dimensions mm	530*400*530	700*400*780	100*800*1300
Net weight kg	70	90	420
