

## Bottle Unscrambler LPJ250/LPJ400

LPJ serial full-automatic bottle unscrambler is the support equipment for the soft beverage filling equipment, applicable for the orderly arrangement of messy PET bottles and the delivery of them to production line.

According to the user requirements, the bottle types can be flexibly altered, convenient and rapid. It adopts the structure of innovative push-and-hold bottle unscrambler, maximally reducing wearing of the bottle body.

The frame is made of excellent stainless steels; and other parts, non-toxic and durable materials. The adopted key parts of the electric and pneumatic systems are famous brands. The whole process is controlled by PLC, so the machine has a low fault rate but a high reliability.

### Technical Parameters:

Model	LPJ250	LPJ400
Production Capacity	15000B/H	24000B/H
Applicable Volume	350ML-1500ML	250-1500ML
External Dimensions (L*W*H)	3100x2600x2200	4500x3600x2250
