

DLZ-320 Full-Automatic Continuous Stretching Vacuum Packaging Machine

DLZ-320 full-automatic continuous stretching vacuum packing machine is applicable for plastics-plastics, paper-plastics and stiff-plastic packing by the way of vacuuming, gas-filling and skin packaging, suitable for a variety of foods, meat products, seafood products, fruits and vegetables, frozen meats, medical apparatus and instruments, hypodermic needles and infusion apparatus.

Performance and characteristics:

1. Photoelectric tracking, you can choose to color Velum or film for packaging, reduce costs, and improve product quality.
2. The type of the vacuum packaging machine with servo motor control system.
3. Based on the user product packaging requirements, equipped with automatic coding system.
4. Product packaging according to user requirements, based on the vacuum, vacuum packing machine can be filled with nitrogen gas or gas mixture packaging.
5. Automatic photoelectric eye tracking equipment.
6. Imported chain for all thickness of stretch film of vacuum forming, special packaging.
7. with corner waste material recycling system, maintaining environmental hygiene.
8. Using advanced pallet conveyor structures, faster and convenient operation.

Technical Parameters:

Model	DLZ320
Width of upper film	293mm
Width of lower film	322mm
Vacuum level:	$\leq 200\text{Pa}$
Packing speed	6-15 times/min
Vacuum	$\leq 200\text{Pa}$
Compressed air	$\geq 0.6\text{MPa}$
Cooling water	$\geq 0.15\text{MPa}$
Power supply	380V/50HZ
Capacity	12KW
Machine Dimension	5300mm×950mm×1860mm
Total weight	1800kg
