

Accura / 100% CAPSULE CHECKWEIGHER

Accura, a series of 100% capsule check withers can be easily integrated with existing high speed encapsulation machine for pre or post fill check weighing. Enhancing the quality of capsules the Accura ensures that every capsule is well within compliance limits. The Accura's measuring capabilities are enhanced by pioneering EMFR load cells from Wipotec, Germany which are sensitive to variation of 1 mg. The group load cell technology along with the compensation cell ensures accuracy of +/- 2 mg

Features:

- Capable of measuring weight of each capsule pre and post filling
- Speeds of up to 40,000 capsules per hour
- Highly accurate EMFR principle from Wipotec, Germany with Compensation load cell
- Group load cell technology with compensation load cell for most accurate results
- Versatile weighing capability of any size and fill (eg. Liquid filled capsules)
- Pneumatic controlled rejection mechanism with rejection acknowledgment system ensures high accuracy
- Safety features include auto tare, auto pan clean, servo error sensors, excess variation alarms and self-identification of weigh cell errors
- Fail safe measures such as Extension chute flap
- Controlled via intuitive Industrial PC interface
- Compliance with GMP and 21 CFR Part 11
