

Horizontal Wrapping Machine for Formed Products (Pillow Pack) JH-300

The JH-300 is a horizontal high-speed wrapping machine for formed products in fin seal (pillow pack). The products are feeding by manual into the magazines then transferred by the removal wheel and delivered to the segments of the cam chain. One pairs of foil sending rollers, one pair of sealing rollers for the longitudinal seam and a cross sealing unit guarantee a tight pack. The JH-280 is equipped with PC box, datas are visually insertable. Two pairs of sealing rollers for the longitudinal seam and a cross sealing unit guarantee a tight pack.

Special features:

- Infinitely variable adjustment of the wrapping material length
- Quick and simple size change by a few adjustments only
- Visually insert and detect wrapping material length
- Visually insert and control temperature
- Tooth conveyor transmission drives
- Multi-packs (up to 5 – preferably round products) are possible
- Food touch parts are in stainless steel

Technical Characters:

Output	Up to 250 pieces/min		
Product dimension	Length: 30– 250mm	Width: 120mm	Height: 4 – 40mm
Drive	1 AC drive	Mechanical running	2.8 kw
	3 AC motors	manul feeding system	
System	LED single-chip microcomputer		
Utilities	Temperature	Lower than 25°C	
	Humidity	Less than 50%	
Wrapping material	Heat sealable foil	Cold sealable foil	
Material dimensions	Reel diameter: max. 370mm	Reel width: max. 120mm	
Measurements	4002*913*1611mm		
Weight	Approx.700 kg
