

High Quality Automatic Side Sealer Shrinking Machine RY-BF-700

Performance features:

1. High Quality Automatic Side Sealer Shrinking Machine with the function of automatic film feeding punching, coating, sealing cutting, waste film automatically rolling in one time which is widely used in mass production packaging line with high efficiency.
2. The entire machine realizes unmanned operation with the production line connecting.
3. Manual adjustment film-guide system and feeding conveyor platform make the machine suitable for different width and height items.
4. The sealing part is consisting of transverse sealing and side sealing, both can be lifting controlled independently.
5. Applies to LED Panel ling. LED lamps. LED tubes. Photo frame, picture frame, flooring, aluminum profile, wood products and other products packaging.

Technical Parameter:

Model	RY-BF-700 High Quality Automatic Side Sealer Shrinking Machine
Power Supply	AC 220V 50/60Hz
Power	1.35KW
Max. Packing Size	(L)unlimited;(W+H)≤700mm; (H)<150mm
Packing Speed	15~30 pcs/min
Air Source	0.5Mpa
Shrink Film	POF
Machine Size	(L)2300×(W)1250×(H)1500mm
G./N. Weight	300KG
