

QWZ360 Three Servo Motor Tray-Free Biscuit

Adopting Japanese servo control technology and complete Japanese electrical elements, this machine has reached world advanced level. It is very suitable for packaging several pieces of biscuits on edge without tray. Biscuits of square, round, oval shapes are all package able.

Features:

1. Eight inches color touch screen control panel, easy for operation, all parameters can be set precisely, accurate cutting and sealing.
2. Simplified mechanical drive, stable running and low noise
3. Formula memory function, parameters for different types of products can be memorized as different formulas, fast and convenient to change product.
4. Automatic bag length measuring function, automatic eye mark tracking function, automatic alarm and indication function.
5. Soft biscuits clamping device prevent biscuit from being damaged during the process of conveyance, reduced reject rate.
6. Unique air suction system makes the package tighter, reduced the oxidation rate of biscuit.
7. End sealer and long sealer automatically open when machine stops, preventing film burnt.

- Capacity: 30 to 120 packs/minute
- Product size limits:
- Length: 80 to 240mm, Width: 30 to 90mm, Height: 30 to 80mm
- Size of main machine (L x W): 4,600 x 1,260mm
- Power consumption: 8.2kw, three-phase 380V, 50Hz
- Net weight: 1,500kg
