

Drinking Water Washing Filling Capping Machine XGF-series

Automatic water filling machine can produce 20000 bottles per hour in 500 ml pet bottles. The automatic water filling machine is made by our company is a new product which is researched and developed on the base of importing ,assimilating and absorbing the advanced technology of the same kind of domestic and foreign products, combining several-year-production experience of the company. The unit collects washing, filling and capping together. It is driven by a transmission motor. It has advantages, such as high automation level, compact structure, beautiful appearance, convenient and simple operation, safe and reliable and adjustable continuous production capacity and others. It is ideal no-gas liquid filling production equipment in the country. It is mainly suitable for filling and capping of round or square polyester bottles. According to the demands of different specifications of users, it is only changed a little in design to meet the user's demands.

Technical parameter:

Model	XGF14-12-5	XGF16-16-5	XGF18-18-6	XGF24-24-8
Washing Heads	14	16	18	24
Filling Heads	12	16	18	24
Capping Heads	5	5	6	8
Capacity (b/h)	5000	8000	10000	12000
Power(kw)	1.5	2.2	2.2	3
Dimensions(mm)	2200*1550*2450	2850*2450*2450	2910*2150*2450	2850*2200*2450
Weight	2000	2400	2500	4200
Voltage	380V			
Suitable Bottle Shape	circular, square			
Suitable caps	plastic screw cap			

Bottle Diameter(mm)	50-90
Bottle Height(mm)	150-310
Compressed Air Pressure(Mpa)	0.3-0.7
Washing Medium	aseptic water

Model	XGF32-32-8	XGF40-40-10	XGF50-50-12
Washing Heads	32	40	50
Filling Heads	32	40	50
Capping Heads	8	10	12
Capacity (b/h)	15000	20000	26000
Power(kw)	3	7.5	9
Dimensions(mm)	3430*2630*2450	4300*2930*2450	5000*3840*2450
Weight	6000	7000	9000
Voltage	380V		
Suitable Bottle Shape	cirular, square		
Suitable caps	plastic screw cap		
Bottle Diameter(mm)	50-90		
Bottle Height(mm)	150-310		
Compressed Air Pressure(Mpa)	0.3-0.7		
Washing Medium	aseptic water
