

Automatic Red Chili Powder Packing Machine LG-350

We are a manufacturer of automatic red chili powder packing machines. Our machines are superior in performance and reasonable in price. Our company has many cooperative factories and the company is developing well in the market. We provide our customers with first-class products and services. The perfect price, the perfect product, we will certainly meet your needs.

The structure of chili powder packing machine not only has high precision, greatly improve the accuracy of the machine, but also simple and convenient operation, it can achieve a worker operate multiple machines at the same time, effectively save the labor cost of the company. This machine is an automatic packaging machine, which can automatically and quickly complete filling, bagging, sealing, date printing, charging and other processes.

And red chili powder packing machine can choose sealing device, can choose different sealing style according to different products. The machine is equipped with a centralized CPU system and a stepper motor system. The double-system operation is more convenient and accurate to set the packaging length. Although chili powder packing machine has a simple circuit system, its function is also very powerful, which is very conducive to operating steps with fewer operators and improving production efficiency.

Advantages Of Automatic Red Chilli Powder Packing Machine

The whole body of red chili powder packing machine is made of stainless steel, which is safe, hygienic and durable.

The machine adopts touch screen system and stepper motor control system, which can make the packing length more accurate.

The frequency control system provided by the machine can make the packaging more convenient, smoother, simpler and save time and film.

For temperature control, chili powder packing machine adopts independent PID control system, which can control temperature better and adapt to various packaging materials better.

Red chili powder packing machine can complete filling, bagging, printing date and other operations at one time. And the belt drive system of the machine is simpler and easier to maintain.

All our control is realized by software control, these software systems can effectively promote the function adjustment and technology upgrade of red chili powder packing machine, so that our system is constantly updated and will never lag behind.

Technical Data:

Model	LG-350
Bag Size Making	L: 50-320mm W: 30-150mm
Thickness of Packing Film	0.04-0.08mm
Diameter of Rolling Paper	=<400
Packing Speed	30-60 Bags/min
Power	2.5KW/220V
Measure Range	10-200g
Weight	480kg
Dimensions	820x900x1980mm
