

LP-D70 Square Barrel Pet Bottle Unscrambler Machine

This machine consists of a bottle elevator, mainframe, and conveyors. Adopts PLC control system to integrate each driving part together. Parameters can be changed by the touch screen to meet different required speeds. Different bottles are applicable just by changing the turnplate inside the bowl, and other parts can be freely adjusted. This unit meets GMP standard, which is made of SS304 and aluminum alloy. All driving areas are covered by protection doors, which makes machines safer and friendly-environmental.

Technical Parameters:

Items	performance
Bottle spec.	L120-230mm W70-120mm H250-350mm
Speed	≤3000 bottles per hour
Power supply	AC 380V, 50Hz
Power	4.5 Kw
Conveyor height	900mm±50mm (may be customized)
Machine dimension (L×W×H)	4880mm×2430mm×2286mm
Machine weight	About 1200 Kg
