

Automatic Gas Can Filling And Sealing Machine (DYGZ18-18-4)

This Machine mainly used in the soft drinking/beer filling operations, the two function of can filling and capping are composed in one body of the machine, the whole process is automatic, it is conveniently trunked to adjust the machine to fill various types of bottles, the filling operation is faster and more stable due to the advanced Germany filling valve technology. The famous brand programed controller (PLC) is adopted to control the machine runs automatically.

Description:

1. High precision filling nozzle, PLC variable signal control, ensure high filling precision & filling smoothly & steadily
2. All 304 stainless steel contact parts & liquid tank, fine polish, easy to clean
3. Filling valve, guide rail, elevating device, etc.
4. Different filling type For different beverage liquid
5. Filling volume adjustable
6. All food grade SUS304/316 design, harmless for beverages and easy to clean
7. No can no filling

Application:

Function: filling-sealing system	Control: PLC
Suitable: Can with lid	Bottle Size: 250-500 ml
Filling System: Isobaric Filling	Capacity: 5,000-6,000 CPH For 250-500ml
Application: Soft drinking	

Technical parameters:

Model	DYGZ18-18-4
Capacity: (for 250-500ml)	5000-6000 CPH
Suitable bottle shapes	Round
Solid Filling heads	18
Filling heads	18
Sealing heads	4
Compressor air	0.4-0.6MPA
Application	Soft drinking/Beer
Power	5.05w
Overall Dimensions	4300*2080*2250 mm
Weight	4300kgs
