

Tea Powder Mixing Machine CH-100

Main Application This Mixing Machine is used for mixing powder or wet materials to make main and auxiliary materials of different proportions mix evenly. The Mixer Machine is made of stainless steel where it contacts with materials. The gap between pulp leaves and barrel body is small and there is no dead Angle in mixing. Sealing device is set at both ends of stirring shaft to prevent material from exuding. Widely used in pharmaceutical, chemical, food and other industries.

Technical Parameters:

- Model: CH-100
- Application: Medicine Processing, Chemicals Processing, Food Processing, Liquid
- Max. Loading Volume (L): 60 L
- Max. Loading Capacity: 60 L
- Weight (KG): 350 KG
- Dimension(L*W*H): 1400*580*1000mm
