

MK-T90 Vertical Form Fill Seal Machine

The MK-T90 vertical form fill seal machine not only carries out tea bag and outer envelope packaging, but also adds a drip to the tea bag, meaning consumers can tear the envelope used to pack the coffee powder or tea, spread the hangers to both sides of your cup, and pour boiled water into the filter bag.

Packaging materials:

- Drip coffee filter paper;
- Composite film.

Additional Options:

- Packaging line feeder;
- Ink Printer.

Technical Parameters:

- Sealing type: 3 side seal;
