

Link-CM-11 Automatic Plastic Bottle Capping Machine

The fully automatic capping machine of our factory adopts electrical combination to control the movement, with high stability. It can lock caps of different shapes and specifications. The speed of the cap locking can be adjusted and the tightness can be adjusted according to different caps.

Technical Parameters:

Model:	Link-CM-11
Production efficiency:	20-45 bottles/min
Applicable bottle type range:	bottle height 70-330 mm
Applicable cover type range:	20~65mm
Air source pressure:	0.4-0.6mpa
Power supply voltage:	220V/50HZ
Machine net weight:	90kg
Total machine power:	0.8kw
Dimensions (L×W×H):	760×1450×2000(mm)
