

TTG-IS Filling and Capping Machine

This type of equipment is the update version form TTG-I filling and capping machine according to the requirement of market. It applies widely to pharmaceutical, food and chemistry industry. It integrates the function of filling, stoppering, capping into one machine, and feature of compace structure, volume economy, both of round bottle and abnormal bottle are suitable for this machine.

Technical Parameter

- Capacity: 40-60bottles/min
- Filling precision: $\pm 2\%$
- Application: 2-30ml 20-500ml
- Power supply: 380V 50Hz
- Power: 1.5kW
- Weight: 650kg
- Dimension: 2440x60x1450mm
