

Syrup Washing Filling Capping Machine

Syrup Washing Filling Capping Machine includes syrup bottle air /ultrasonic washing, dry syrup filling or liquid syrup filling and capping machine. It is integrate design, one machine can wash, fill and screw bottle in one machine, reduce investment and production cost. The whole machine is with very compact structure, small occupying area, and less operator. We can equip with bottle handing and labeling machine also for the complete line.

Advantages

1. Customized capacity from 3000-12000 bottles/hour.
2. High automation, reasonable operation process and optimization of integration.
3. Suitable for different size syrup, dry and liquid types.
4. Intelligent & Humanized Operation System. Humanized design for each station, PLC +HMI control.
5. No bottle no filling, no bottle no capping.
6. High filling precision and qualified rate.

Technical Specifications

Applicable Specs. S	50-500ml
Working Speed	3000-12000pcs/hour
Filling Method and Accuracy	Dry powder: screw filling, $\pm 2\%$ Liquid solution: peristaltic pump filling, $\pm 2\%$
Capping Method	Threaded Capping
Power	380V/50HZ, 19KW
Speed controlling	Frequency control
Space Occupation	According to different capacity
