

HZLP-100 Auto Bottle Turnable

The automatic transmission is suitable for round bottle, square bottle, such as conveyor belt connected to the labeling machine, filling machine, capping machine, automatic bottle feeding, improve efficiency; can be applied to the intermediate junction line, as a buffer platform, shorten the length of conveyor belt. Applicable bottle range can be adjusted freely, bottle conveying speed 30~200 bottle / minute, speed can be stepless adjustment, convenient production arrangement.

Product features/suitable range:

1. The automatic transmission is suitable for round bottle, square bottle, such as conveyor belt connected to the labeling machine, filling machine, capping machine, automatic bottle feeding, improve efficiency; can be applied to the intermediate junction line, as a buffer platform, shorten the length of conveyor belt;
2. Bottle range can be adjusted freely, bottle conveying speed 30~200 bottle / minute, speed can be stepless adjustment, convenient production arrangement.

Working principle:

1. Bottle machine glass turntable drives product rotation;
2. The product is close to the glass turntable under the fluctuation of the bottle drawing plate;
3. Product along the bottle manager machine bottle slot orderly export.

Parameter:

Model	HZLP-100
Voltage	AC220V
Suit bottle neck diameter	φ20mm~φ100mm
Suit product hight	20mm~150mm
Machine size	1700*1100*1200mm
Note: The standard model of technical parameters, special requirements and other functions, the machine can be customized
