

KENO-L104 Non-Dry Glue Labeling Machinery

Product Description

- 1) Using vertical sticking label, add special orientation and pressing top installation to make bottle body stable, the machine head can adjust at will to suit any irregular shape
- 2) Install the special pressure label installment guarantees the label itself smooth
- 3) Using synchronization meter tracing, the conveyor belt may modulate velocity at will and the speed of label supplying keeps same
- 4) If it attaches the printer, the synchronization can complete the label printing

Technical Parameters

- Object to apply: Two sides of flat bottle, elliptical object, and some irregular bottles.
- Dimensions (L x W x H): 2440 x 1300 x 1700mm
- Label length: 15 - 300mm
- Label height: 15 - 170mm
- Object thickness: 15 - 120mm
- Object height: 20 - 300mm
- Power supply: 220V, 50/60Hz, 0.5kW
- Weight: 480kg
- Label speed: 0-200 pcs/min
