

T-550 High speed trapping labeling machine

Suitable for all kinds of square, round, oval and various irregular curve bottle sleeves. It adopts the box buffer type labeling mechanism and has good buffering performance. Using imported famous brand servomotor, the labeling speed is fast, the precision is high and the stability is good. The single-slide belt drive is used for both the pull-tab mechanism and the cutter holder. The transmission precision is high and the replacement is convenient.

Technical Parameters:

| | |
|---------------------|-------------------------|
| The bottle diameter | 30-95mm |
| Labeling speed | 0-550 bottle/min |
| Labeling precision | ±1mm |
| Labeling length | 35-200mm |
| Outer dimension | 2400×950×2500mm (L×W×H) |
| Total weight | 650kg |
| Total machine power | 6.5KW |
| Power supply | 380 V,50 HZ |
