

MIC 24-24-8 Small Beer Bottling Line

MIC 24-24-8 Small Beer Bottling Line is applicable for glass bottle filling capping machine for craft Beer

Machine working principle:

1. Isobaric pressure filling, controlled by pressure, accuracy is $\pm 1\%$, liquid level difference is not more than 4-5mm (cause bottle has difference when it produced). easy adjustment on liquid level.
2. Glass bottle capping machine is qualified for Chinese capping standard, and no air leakage at all, machine capping rate is 99.5%.
3. Aluminum cap and crown cap are ok problem working on our capping machine (different capping head), We use our own technical drawing and own processing machine, to make sure our capping head quality and always easy to purchase.
4. If bottle stock on conveyor sensor will inform PLC to stop at the feeding part.
5. About machine automation, we are able to do what client required.
6. About machine test and shipment, we are stick with real production test till all problem is fix and then ship out.
7. Consider of product various ability, we are able to make machine for replace air from the can package.

Technical Parameters

Model	MIC-24-24-8
Washing heads	24pcs
Filling heads	24pcs
Capping heads	8pcs
Volume	0.1-1L
Production capacity	2000-6000 bottle/hr base on 330ml
Filling method	Isobaric (once vacuum)
Power	1.5kw 380V/50HZ(According to customer)
Air pressure	0.7Mpa
Gas consumption	0.8m³/min
Water consumption for bottle washing	1.5-2T/H
Wash bottle water pressure	0.2~0.25 Mpa
Weight	4500kg
Dimension	2500×1400×2500mm
